📁 PROJECTS

Ata'a Dashboard ⤢
2022
Ataa is a web application built with React for managing and organizing the operations of a charity organization. The application includes a landing page that provides an overview of the charity's mission and goals. Staff members of the charity can log in to the main dashboard, which allows them to manage and control the projects, employees, and beneficiaries associated with the charity. Additionally, there is a section dedicated to viewing the total budget of the charity, as well as the budget allocated to each individual project.

Global Share ERP System ⤢
2023
The Global Share ERP System is an innovative web-based application designed to streamline volunteer recruitment, management, and reward systems. It incorporates task management, recruitment, and gamification features to enhance employee engagement, promote effective communication, and drive organizational excellence.
The purpose of the Global Share ERP System is to address the challenges faced by organizations in managing employee tasks, recruiting the right talent, and promoting employee engagement. By providing a comprehensive suite of tools, the system aims to streamline HR processes, facilitate effective communication, and foster a culture of excellence. This document serves as a baseline for the development team, providing a clear understanding of the project's goals and objectives.
